DETAILED ACTION

Election/Restrictions

1. Claims 20-26 and 28 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction requirement in the reply filed on October 20th, 2005.
2. Applicant's election with traverse of Group II, claims 19 and 27 in the reply filed on October 20th, 2005 is acknowledged. The traversal is on the ground(s) that examination of all claimed subject matter would not result in a burdensome search. This is not found persuasive because these inventions have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

The requirement is still deemed proper and is therefore made FINAL.

Claim Objections

3. Claim 27 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 27 is drawn to a protective layer transfer sheet, according to the method of claim 19. However, claim 19 is drawn to a protective layer transfer sheet according to the same method.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 19 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The phrase "on top of each other" is indefinite, because it fails to identify which sheet is on top, or what surfaces are in contact with one another.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 19 and 27 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by U.S. Patent No. 5,397,634 to Cahill et al.
8. As to claims 19 and 27, Cahill et al. discloses providing a protective layer transfer sheet comprising a thermally transferable protective layer having a single or multi-layer structure separably provided on a substrate sheet (column 2, lines 33-49). It should be noted that in an apparatus claim the manner of operating the device does not

Art Unit: 1734

differentiate an apparatus claim from the prior art. Therefore, the manner in which a claimed apparatus is intended to be employed does not further limit the claim.
